

# THE BHAGAVAD GITA STUDY GROUP

with Sat Shree's Online teachings

**Reflect, Recognize, Reveal, Recognize**

The Bhagavad Gita is an ancient scripture that describes the journey of consciousness that we are all travelling, whether we know it or not. It is not a religion or a system of beliefs. It is a living scripture that offers a new paradigm for being, and for living the new consciousness now coming to the planet. Study of the Gita enhances one's existing religious or spiritual practice directly through one's own life.

During our time together, we watch a video of Sat Shree's teachings and his commentaries of The Bhagavad Gita. After we watch the video, we sit in silence and stillness for a few minutes, and then we have a discussion of the material and how it relates to our lives today.

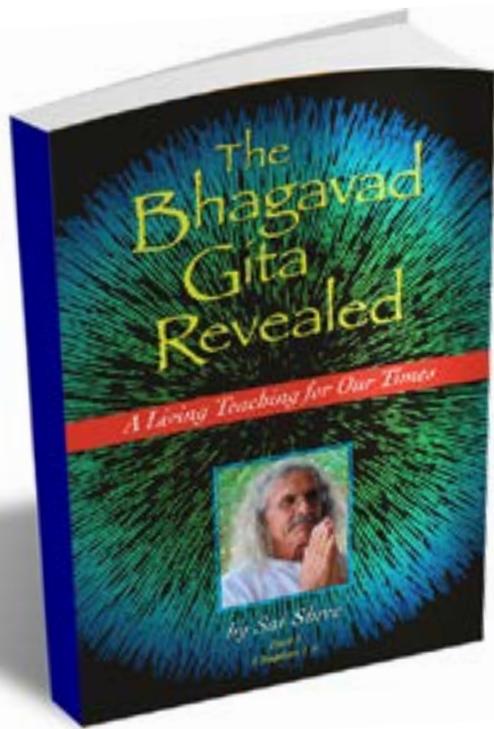

In preparation for each session you should read a chapter of the Gita. You can also watch and/or listen to Sat Shree's teachings and commentaries of The Bhagavad Gita. The group will be ongoing and you may join us at any time.

# THE BHAGAVAD GITA REVEALED STUDY GROUP

*"Transformation is a naturally occurring process of one's awakening. It is a very mechanical process of unfolding. As consciousness wakes up, it begins to let go of its identity as a biological being and starts to identify itself with its original source—which can be experienced and known."*

~Sat Shree

The Bhagavad Gita Revealed is Sat Shree's revelations of the Bhagavad Gita revealing the nature of the spiritual journey from awakening to merger with the Supreme to becoming a channel of the Supreme into the world. What makes this book unique is that in it Sat Shree speaks directly from his own experience of the Bhagavad Gita to the hearts of seekers in this time.

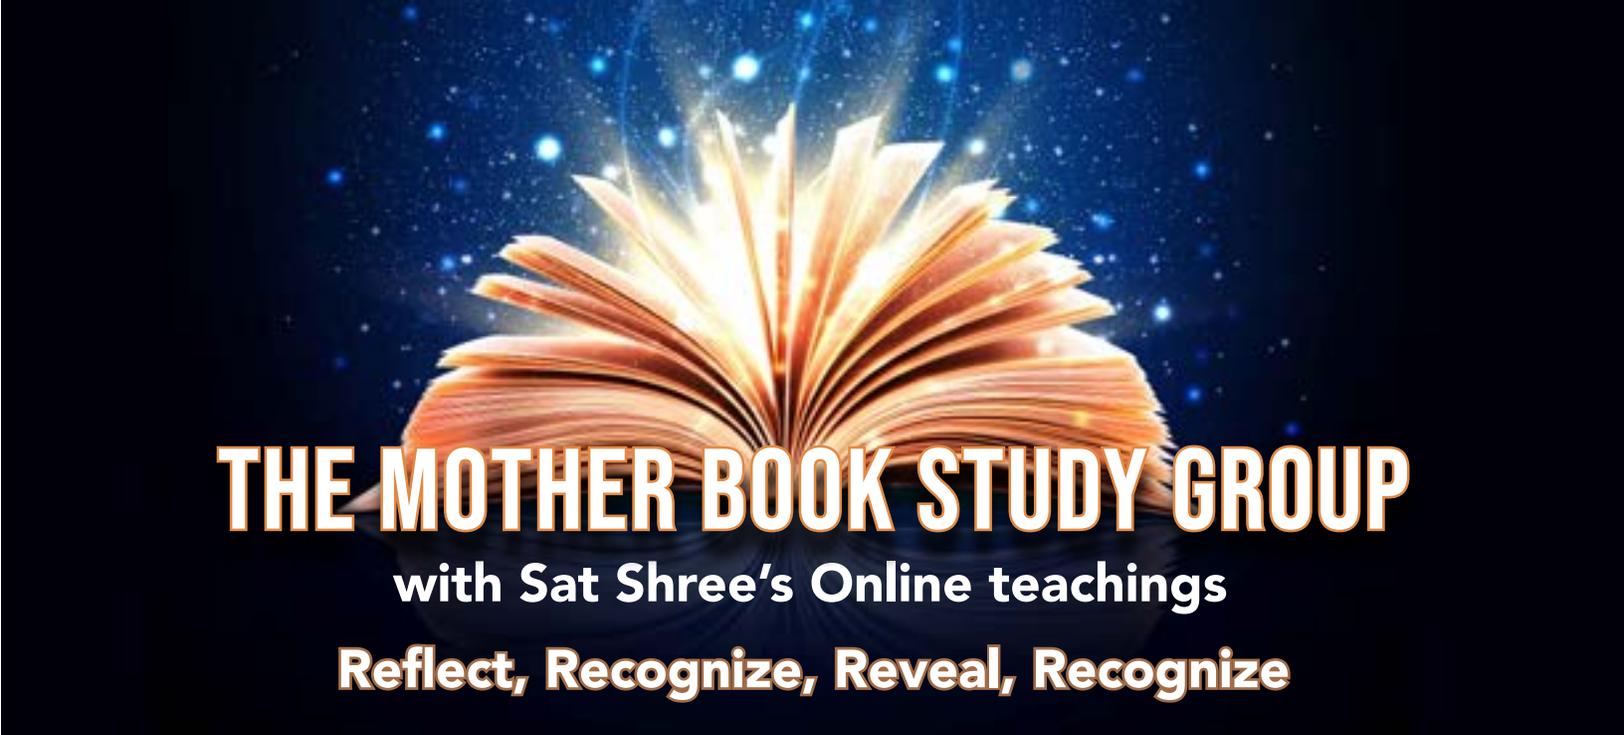

The opportunity of studying the Bhagavad Gita Revealed in a study group is that a synergy is created that enhances the power of these revelations and the possibility to apply them in our lived lives.

# THE MOTHER BOOK STUDY GROUP

with Sat Shree's Online teachings

**Reflect, Recognize, Reveal, Recognize**

*"The Mother is a handbook. It is a body of information that is tangible and distinct and that one can apply. Sri Aurobindo and the Mother of Pondicherry brought a new force into the collective consciousness. He called this force the Mother's force, or the Supramental, and he wrote **The Mother** to help the people in their community align their consciousness with this descending force."*

*"The Mother is a book about surrendering to the Divine Mother, the one who is the actualizing authority of creation that carries the burden of the expression of the original intent into existence to evolve, to learn, to develop, to know, to experience and eventually to wake up. It is all about manifestation."*

~From Sat Shree's revelation of The Mother book

During our time together, we will read a portion of The Mother, listen to a segment of Sat Shree's revelation on the book, sit in silence, and then discuss our experience in applying the material in our lives.
